

CASE STUDY: LINAMAR

"This was a time critical job, and the work was completed over a weekend to minimize disruption."

COMCEN PROVIDED

- CONFIGURATION
- INSTALLATION
- PROFESSIONALISM

In 2008 the Linamar Corporation, market leading precision manufacturers with 37 production sites across North America, Europe and Asia, made a major investment in new premises in Swansea.

Their move into the 200,000 square foot site was supported by the dedicated engineering resource and project management consultancy of Comcen.

This was a time critical job, and the work was completed over a weekend to Minimize disruption.

Comcen built and configured new Servers, upgraded fibre infrastructure for the internal network and links to the parent company Wide Area Network and updated each PC/appliance on site (a total of 100 plus devices) to join the new domain.

Comcen staff support included director-level project managers, plus junior and senior MCSE technicians.

Linamar remains a valued Comcen client.
